EXPERIENCE

Rapid7 , Belfast— Software Developer II in Test

Feb 2025 - PRESENT

- Built and maintained Playwright automation for functional testing.
- Created regression suites using Robot Framework.
- Used Datadog for monitoring before leading migration to k6 + Grafana.
- Built synthetic and performance monitoring infrastructure using Terraform.
- Worked with AWS EC2, S3, Lambda for test environments.
- Used Docker for isolated environments and WireMock for API simulation.

Unosquare, Belfast— Quality Engineer

Jan 2021- Feb 2025

- Manual testing for Cancer Testing and Reporting System (regression & E2E).
- Wrote tests in Qtest and managed defects via Jira.
- Supported sprint delivery and owned story/test coverage.
- Ran and debugged TestCafe automation via Jenkins or locally.
- Automated tests using Cypress.
- Contributed to in-house event tracking application (C# backend, SQL DB, React UI).

Deloitte , Belfast— Senior Quality Analyst

Sept 2017- Jan 2021

- Manual testing across multiple government and financial platforms.
- Utilized AWS S3 and DynamoDB for data validation.
- Used BrowserStack for mobile device testing.
- Created Test Completion Reports for major releases.
- Wrote regression, integration, and E2E tests.
- Used Jira and HP ALM for test and defect management.
- Used Selenium Chrome extension for automation.
